## LETTER FROM FPA

How are today's advisory firms compensating employees, motivating them to produce desired outcomes and creating work environments that promote job satisfaction? The 2015 Trends in Adviser Compensation and Benefits study, conducted by the FPA Research and Practice Institute ${ }^{\text {Tw }}$ (RPI) in partnership with Financial Advisor IQ (a news service of the Financial Times), reveals how firms are addressing these challenges and suggests what they plan to change in the years ahead.

This new research will help CEOs and principals, senior advisers and planners, junior advisers and key support staff better understand how their compensation and benefits stack up to others in the profession. RPI's original research on topics directly relevant to the advice business will help professionals prosper in today's challenging financial-services landscape.

Be sure to visit www.onefpa.org/business-success for more from FPA and the FPA Research and Practice Institute ${ }^{T M}$.

LAUREN M. SCHADLE, CAE
CEO/Executive Director
Financial Planning Association

## LETTER FROM FINANCIAL ADVISOR IQ

When Financial Advisor IQ runs an article about compensation, I know the story will get plenty of hits. Right or wrong, it's human nature to associate our pay with our value as professionals and to be passionately interested in how our peers are compensated. And if we manage a business, we know we must pay associates competitively to survive.

In partnership with the FPA Research and Practice Institute ${ }^{\text {miw }}$, Financial Advisor IQ has peered into the nooks and crannies of compensation to help advisers benchmark their own practices. We asked how effectively salaries, incentive pay, bonuses, benefits and development programs motivate teams. We examined hiring and outsourcing plans for firms of different sizes and in different channels. The results suggest the profession is struggling to get compensation right as teams get bigger and client needs get more complex.

Financial Advisor IQ will be exploring the main themes of this study report in a series of in-depth articles that include insights from top advisers. Please come to www.financialadvisoriq.com to read this and other coverage designed exclusively for you.

## TRENDS IN ADVISER COMPENSATION AND BENEFITS

## ABOUT THE STUDY

The 2015 Trends in Adviser Compensation and Benefits study was developed to meet two distinct needs. For managers or owners of financial-advice firms, the goal was to help drive team engagement and loyalty by providing insight into how other firms structure compensation and invest in their people. For other team members, the goal was to provide benchmarks for making informed decisions.

Our report incorporates feedback from 694 respondents in a range of roles within the profession. Participants responded to an online survey conducted in February, 2015. The study's overall margin of error is $+/-3.72 \%$ (the margin of error is higher where data is broken down by role or other criteria). The sample represents advisers and planners from across the country and across channels, and it includes both Financial Planning Association members and non-members. For a full participant profile, please see Appendix 1.

About a third of respondents work at independent RIAs; $22 \%$ at national, regional or independent brokerdealers; $10 \%$ at wirehouses; $12 \%$ at hybrid RIAs; and the balance in other channels. Approximately half the respondents are decision makers on compensation and benefits, and that group was asked about how they structure plans for their teams. The balance of respondents was asked about their roles, personal compensation and perceptions on a range of issues.

The first part of this report examines compensation and benefits, job satisfaction, and team growth and development, through the eyes of both decision makers and staff. The second part, "Key Metrics by Role," provides data points for specific team members, allowing readers to quickly find the relevant statistics for their own firms.

Attracting and retaining talent in the financial-advice profession gets more difficult every year. As the field evolves to meet clients' changing needs, new business models spring up and paradigms shift, in everything from salaries and benefits to training and outsourcing. Our survey asked what today's practitioners care about and how firms are trying to make their employees happy. Here are the highlights:

## COMPENSATION AND BENEFITS

Study respondents find it a challenge to structure the right compensation and benefits plan. Even though most firms invest significantly in their teams, and many have created sophisticated compensation structures, fewer than a third of decision makers feel their compensation plan is highly competitive. And that number drops to just $22 \%$ when the group is asked about benefits packages.

Firms invest in their teams in a variety of ways, but compensation and benefits are a critical piece of driving satisfaction and staying competitive. The data suggests that firms use compensation and benefits strategically to encourage specific behaviors - yet decision makers and staff have different opinions about which benefits are most valued. The study found that:

- Median compensation (from all sources) ranges between $\$ 50,000$ and $\$ 249,000$, depending on the role.
- Firms use a range of compensation structures, including bonuses and incentive pay, and these are likely to differ by role to drive different behaviors.
- $63 \%$ of respondents offer incentive pay based on new revenue, $56 \%$ based on new assets and $32 \%$ based on client satisfaction.
- $77 \%$ of firms offer some form of benefits, but benefits packages vary widely.
- $60 \%$ of firms anticipate increasing their investment in compensation in the next 12 months, and $22 \%$ say they will increase their investment in benefits.

## JOB SATISFACTION

While job satisfaction is relatively high overall, the survey results hint that where dissatisfaction exists, it's connected to compensation and benefits. The data also suggests that management may not fully understand why team members choose to leave their firms. The study found that:

- $44 \%$ of respondents are very satisfied, and $33 \%$ are somewhat satisfied, with their jobs.
- However, only $26 \%$ of respondents are very satisfied with their compensation, and just $27 \%$ are very satisfied with their benefits.
- $26 \%$ of staff said they plan on leaving their firms in the next two years.
- Management and staff have differing views as to why staff leave their roles.

## TEAM GROWTH

As the industry expands, so do the teams that support it. Looking forward through 2015 and beyond, the data suggests a net growth in staff along with some movement across firms as the result of planned movement by employees. The study found that:

- $55 \%$ of firms plan on hiring in the next 12 months, with RIAs driving most of the activity.
- $29 \%$ of firms are dissatisfied with their current hiring process.
- $42 \%$ of firms outsource some functions, and plan to continue to do so, with $38 \%$ of those intending to outsource even more. The $58 \%$ of firms that do not outsource have no plans to start.

## TEAM DEVELOPMENT

Although most firms support their teams in personal and professional development - financially or otherwise - new-employee training and mentoring are largely informal. Nevertheless, the study found that:

- The average firm invests nearly \$15,000 per year in team development.
- 69\% of firms provide financial support for personal or professional development.
- $60 \%$ of firms conduct formal performance reviews.

## COMPENSATION

To start, we asked participants to share details of their compensation plans. In displaying the results, we use medians rather than averages, because there is a significant range on some salary components. The results represent the median for respondents who receive each form of compensation. They should not, therefore, sum up to the total. For example, the median for someone who receives incentive pay is $\$ 50,000$, but not all respondents receive incentive pay.

Note: This chart shows medians. Therefore, the numbers should not sum to the total.

Q: Please complete the following as it relates to your annual compensation in 2014.

Many firms structure their compensation plans strategically, using different elements (such as incentives linked to team performance) to drive desired behaviors. For example, advisers and planners are more likely to receive some form of incentive pay, whereas non-adviser management and staff are more likely to receive bonuses. In many cases, firms use a fairly sophisticated mix of compensation types, tied to different drivers.

MANAGEMENT

| Base salary | $92 \%$ |  |
| :--- | :---: | :---: |
| Incentive pay | $40 \%$ |  |
| Bonus | $62 \%$ |  |
| Other | $19 \%$ |  |
|  |  |  |

FINANCIAL PLANNERS/ADVISERS

| Base salary | $78 \%$ |
| :--- | :---: |
| Incentive pay | $51 \%$ |
| Bonus | $55 \%$ |
| Other | $21 \%$ |

SUPPORT STAFF

| Base salary | $95 \%$ |
| :--- | :---: |
| Incentive pay | $31 \%$ |
| Bonus | $74 \%$ |
| Other | $6 \%$ |

Note: Other could include such things as options or cashed-out equity.

Q: Which forms of financial compensation do your team members receive?

In general, individual performance drives incentives and bonuses. However, about half of firms also tie compensation to team or firm results.

INCENTIVE DRIVER

MANAGEMENT

| Individual performance | $64 \%$ |
| :--- | :---: |
| Team performance | $59 \%$ |
| Firm performance | $91 \%$ |

FINANCIAL PLANNERS/ADVISERS

| Individual performance | $79 \%$ |
| :--- | :--- |
| Team performance | $48 \%$ |
| Firm performance | $57 \%$ |
|  |  |

| SUPPORT STAFF |  |
| :--- | :--- |
| Individual performance | $70 \%$ |
| Team performance | $59 \%$ |
| Firm performance | $69 \%$ |

$N=$ firms offering each form of compensation

Q: Which of the following drive incentives/bonuses? Please select all that are calculated when assessing total incentives/bonuses for each group.

Most respondent firms link incentives and bonuses to growth, whether measured by new clients, new assets or - most commonly - new revenue. About half of firms take client retention into account in some way when structuring compensation, but only $41 \%$ use client satisfaction as a driver of incentive pay.

FINANCIAL PLANNERS/ADVISERS

| Client retention | $52 \%$ |
| :--- | :---: |
| Client satisfaction | $41 \%$ |
| New clients | $70 \%$ |
| New assets | $63 \%$ |
| Othew revenue | $82 \%$ |

| SUPPORT STAFF |  |
| :--- | :--- |
| Client retention | $48 \%$ |
| Client satisfaction | $49 \%$ |
| New clients | $40 \%$ |
| New assets | $40 \%$ |
| New revenue | $5=$ firms offering each form of compensation |
| Other | $54 \%$ |
|  | $21 \%$ |

Q: Which of the following are used to determine bonuses or incentives?

## BENEFITS

The study went into significant detail to discern which benefits are offered to whom and how the value of various benefits is perceived. Perhaps not surprisingly, most firms offer the same core benefits. But as firms seek to differentiate themselves to attract top talent, they add a broad range of other benefit options as well.

More than three-quarters of respondents said they offer some form of benefits to employees. Yet firm size makes a significant difference to what the package looks like. Among practices with three team members, $55 \%$ offer benefits, whereas $86 \%$ of firms with four team members and $92 \%$ of those with 10 or more do so.

Q: Do you offer any form of benefits to your employees?

The most common benefits for management and staff are:

- Paid vacation time
- Health insurance
- Paid sick time
- Licensing/exam fees
- 401(k) plans
- Financial support for professional development

|  | BENEFITS OFFERED |  |
| :--- | :--- | :--- |

Q: Which benefits do you offer to employees?

## 401(K) PLANS

For the approximately $70 \%$ of firms that offer $401(\mathrm{k})$ plans, $80 \%$ match employee contributions to some degree. Typically, the match is less than $25 \%$ of the contribution, yet $17 \%$ of respondents said they match $100 \%$. Such firms are likely to have nine or more team members.

While firms are generally aligned around the percentage of employee contributions they match, vesting schedules differ. At $42 \%$ of firms, employees are fully vested when they become eligible for the program; however, nearly a third of firms impose a three- to five-year waiting period.

Percentage of salary matched by employer

Percentage of employee contribution matched by employer

Q: You indicated that you have a 401(k) program in place. What percentage of salary and/or employee contribution is matched?

Q: What is the vesting schedule for the firm's 401(k) contributions?

## HEALTH INSURANCE

For the $70 \%$ of firms that contribute to health insurance premiums, half pay $100 \%$ of the cost. The same is true for disability and accident insurance.

| INSURANCE CONTRIBUTIONS |  |  |  |
| :--- | :---: | :---: | :---: |
|  | LIFE INSURANCE | HEALTH <br> INSURANCE | DISABILITY/ACCIDENT <br> INSURANCE |
| None | $38 \%$ | $6 \%$ | $40 \%$ |
| $1-24 \%$ | $3 \%$ | $6 \%$ | $3 \%$ |
| $25-49 \%$ | $1 \%$ | $4 \%$ | $1 \%$ |
| $50-74 \%$ | $5 \%$ | $24 \%$ | $7 \%$ |
| $75-99 \%$ | $3 \%$ | $21 \%$ | $5 \%$ |
| $100 \%$ | $50 \%$ | $40 \%$ | $44 \%$ |

Q: You indicated that you provide some form of insurance contributions for employees. What percentage of premiums do you pay for employees for each of the following?

## ELIGIBILITY

Our data shows dispersion in how long firms require staff to wait before becoming eligible for benefits and incentives. More than a quarter of respondents provide access within a week, yet a greater percentage impose a waiting period of two months or more. Firms are more likely to require a waiting period for incentives and bonuses than for benefits. There is, however, more alignment on how firms handle time off. For 78\%, staff are not paid for time off they don't take.

| WAITING PERIODS |  |  |  |
| :--- | :---: | :---: | :---: |
|  |  |  |  |
|  | BENEFITS | BONUSES | INCENTIVES |
| Less than 7 days | $31 \%$ | $22 \%$ | $27 \%$ |
| $7-14$ days | $1 \%$ | $0 \%$ | $0 \%$ |
| $15-30$ days | $12 \%$ | $2 \%$ | $3 \%$ |
| $31-45$ days | $8 \%$ | $2 \%$ | $4 \%$ |
| $46-60$ days | $10 \%$ | $7 \%$ | $7 \%$ |
| $61-364$ days | $31 \%$ | $37 \%$ | $35 \%$ |
| 1 year or more | $8 \%$ | $31 \%$ | $25 \%$ |

Q: Is there a waiting period before staff become eligible to receive benefits or other incentives?

Q: If a team member does not take all of his/her available time off, do you pay for that time?

## THE VALUE OF BENEFITS

It's a positive sign that decision makers and employees generally agree about which benefits are most important. Yet the two groups diverge in some areas. When we asked decision makers and staff to identify the five benefits they considered most valuable, the top three for both groups were health insurance, 401(k) plans and vacation time. Both also put a high value on a flexible schedule. Beyond those core benefits, however, decision makers name sick time as the most important offering, whereas staff mention the chance to earn equity in the firm. That was the largest gap in how the two groups perceive benefit value.

PERCEIVED VALUE OF BENEFITS

|  | MANAGEMENT PERCEPTION | STAFF PERCEPTION |
| :---: | :---: | :---: |
| Health insurance | 80\% | 76\% |
| 401(k) | 67\% | 65\% |
| Vacation time | 64\% | 45\% |
| Flexible work schedule | 43\% | 35\% |
| Sick time | 28\% | 7\% |
| Dental | 22\% | 20\% |
| Financial support for professional development (including conferences) | 20\% | 21\% |
| Vision | 11\% | 10\% |
| Roth 401(k) | 11\% | 15\% |
| Ability to earn equity | 10\% | 31\% |
| Financial support for designations/technical training | 10\% | 11\% |
| Health savings account (HSA) | 9\% | 13\% |
| Pension | 9\% | 11\% |
| Simple IRA | 8\% | 4\% |
| Long-term disability | 6\% | 18\% |
| Financial support for personal development | 5\% | 6\% |
| Licensing/exam fees | 5\% | 8\% |
| Life insurance | 4\% | 14\% |
| Short-term disability | 4\% | 5\% |
| Flexible spending account (FSA) | 4\% | 5\% |
| Telecommuting | 4\% | 5\% |
| Maternity leave | 4\% | 1\% |
| Planning/investment plan services | 3\% | 2\% |
| Professional dues | 3\% | 5\% |
| SEP IRA | 2\% | 2\% |
| Ability to earn options | 2\% | 6\% |
| Bereavement leave | 2\% | 0\% |
| SARSEP IRA | 1\% | 1\% |
| Paid parking | 1\% | 2\% |
| Wellness/health club coverage | 1\% | 4\% |
| Public transit compensation | 0\% | 1\% |

Q: Which benefits (whether you offer them or not) do you believe employees most value?/ Which benefits (whether you receive them or not) do you/would you value most?

## WHAT'S NEXT FOR COMPENSATION?

Advisory firms' investment in their teams is the biggest one they make. It includes not just salaries but also benefits, outsourcing expenses and development costs. To get a sense of future trends, we asked survey respondents about their current total investment, their plans for the future and how they think their commitments stack up against peers'.

The median investment is nearly $\$ 340,000$ per year - although that number changes dramatically based on firm size. Total investment ranged from $\$ 144,000$ for firms with fewer than three team members to $\$ 1.2$ million for those with 10 or more, with salaries driving most of the difference. Independent RIAs invest the most, followed by broker-dealers and then full-service brokerages, reflecting the nature of each channel's support structure - that is, for a team working within a wirehouse, many outsourcing and development costs are covered.

|  | CATEGORY |
| :--- | :--- |\(\left.\quad \begin{array}{c}MEDIAN INVESTMENT: <br>

ALL RESPONDENTS\end{array}\right]\)

Note: The numbers are medians for those firms who invest in each area.
The numbers should not sum up to the total.

Q: Thinking about your expenses in 2014, how much did you invest in the team?

Structuring the right compensation and benefits plans is clearly a challenge for advice firms. Despite the significant investment they make and the care they put into designing effective packages, fewer than a third of decision makers who responded to our survey feel their compensation plan is highly competitive. And the percentage drops to $22 \%$ when asked about their benefits packages. Firms with more team members or greater scale (whether gauged by revenue or assets) tend to feel more competitive, highlighting the challenge for smaller firms across the U.S.

Compensation

Benefits

Q: How would you rate your compensation and benefits plan compared to other firms of your size?

Given their confidence in their competitiveness, it's not surprising that 60\% of respondents intend to boost compensation levels in the year ahead, although fewer than a quarter plan on changing benefits.

Team engagement is critical to any firm's long-term success. Understanding how compensation, benefits and other investments affect job satisfaction can help shed light not only on team engagement but also on attrition.

The good news is that, overall, respondents are satisfied with their jobs, with over three-quarters of respondents saying they are somewhat or very satisfied.

Q: How would you rate your level of overall job satisfaction?

Perhaps not surprisingly, job satisfaction is closely correlated with role. Whereas 65\% of CEOs said they are very satisfied with their jobs, only $22 \%$ of support staff said the same. Furthermore, the data shows an inverse correlation between age and job satisfaction. The younger the respondents, the less likely they are to be very satisfied with their jobs - which, assuming a link between age and role, may reflect the correlation between role and satisfaction. Finally, the data shows that satisfaction grows with firm size. Respondents from the smallest firms (based on assets under management) are least likely to be very satisfied with their jobs.

It is clear that satisfaction is driven by more than compensation and benefits. Although only a quarter of respondents said they are very satisfied with compensation and benefits, $44 \%$ are very satisfied with their jobs. At the same time, compensation is an important driver of satisfaction, and firms not using other means to encourage team engagement may be at risk of attrition.

Your total financial compensation

Your benefits

Q: Please rate your level of satisfaction with the following.

When we compare overall job satisfaction to satisfaction with compensation and benefits, we find the following:

- There is no difference in satisfaction with compensation or benefits between respondents who are somewhat satisfied with their jobs and those who are very satisfied.
- There is a bigger gap in satisfaction with benefits than with compensation when we compare the groups who are most and least satisfied with their jobs.

On the basis of the above, we can conclude that acceptable compensation and benefits are table stakes for team members. If they are not satisfied with those two elements, they are likely to be dissatisfied overall. However, if team members are generally satisfied with compensation and benefits, other factors will drive them from feeling somewhat satisfied to feeling very satisfied with their jobs.

To dig deeper into what drives engagement, we asked respondents about their views on their firm, basing our questions loosely on those Gallup uses to assess job satisfaction. Overall, respondents' strongest positive sentiment is that their firm does important work for clients.

| CONFIDENCE IN THE FIRM |  |
| :--- | :---: |
| I am optimistic about my firm's future. | 4.3 |
| I am optimistic about my future success within the company. | 4.2 |
| My firm cares about its people. | 4.1 |
| Working for my firm supports my long-term personal goals. | 4.2 |
| At my firm, people get ahead primarily on the merits of their work. | 3.9 |
| I understand our company's direction and goals. | 4.1 |
| I understand how our company's strategy differentiates us from the competition. | 4.1 |
| I understand how my work helps the company accomplish its goals. | 4.5 |
| My firm is a leader in the industry. | 3.8 |
| My firm is a strong competitor in the industry. | 4.0 |
| Our company does important work for our clients. | 4.7 |

Note: Shows average out of five where five is strongly agree.

Q: To what extent do you agree or disagree with the following statements?

Recall that respondents who are very satisfied with their jobs don't feel very differently about compensation and benefits than those who are somewhat satisfied. By contrast, we found gaps between those two groups' level of agreement with the following statements:

- I am optimistic about my future success within the company.
- My firm cares about its people.
- Working for my firm supports my long-term personal goals.
- At my firm, people get ahead primarily on the merits of their work.

The two groups also feel differently about understanding their firm's direction and strategy, and they don't have the same level of optimism about those factors. We can conclude - and human nature probably dictates that staff tend to focus first on their own role and future within the company and next on connecting with their firm's overall direction.

## WHY DO PEOPLE QUIT?

The flip side of understanding job satisfaction is understanding when and why people decide to leave their firms. Our survey results shed light on the prospects for attrition among respondent firms, because while 55\% of decision makers said they plan to hire new team members in the next 12 months, $26 \%$ of employees said they plan to leave their firm in the next 24. Respondents most likely to depart are those in support and administrative roles; they are also most likely to express the lowest job satisfaction.

Decision makers and staff have very different views of why people leave their firms. The disconnect suggests there may be room for improvement in decision makers' understanding of team members' needs. Better communication might help limit attrition and enhance engagement overall.

Nearly two-thirds (63\%) of decision makers said they have lost staff in the last five years. Among these respondents, almost half (47\%) believe the employees left because they weren't a good fit for the job; the next most likely reason, they said, was a desire to change careers. But for non-decision makers, compensation is most often given as the primary reason for leaving, followed by lack of satisfaction with the work environment. Only 3\% percent cite fit and 6\% a desire to change careers.

DECISION MAKERS

| They want to change careers | $23 \%$ |
| :--- | :---: |
| They are retiring/leaving the workforce | $15 \%$ |
| They aren't happy with the work environment | $17 \%$ |
| They aren't happy with compensation | $22 \%$ |
| They aren't happy with benefits provided | $3 \%$ |
| They don't enjoy the work | $6 \%$ |
| There is not enough opportunity for advancement | $14 \%$ |
| There is a lack of training opportunities | $1 \%$ |
| They aren't a good fit for the job | $47 \%$ |
| Other | $11 \%$ |
| Not applicable/I don't know | $1 \%$ |
|  |  |

## NON-DECISION MAKERS

| I want to change careers | $6 \%$ |
| :--- | :---: |
| I am retiring/leaving the work force | $5 \%$ |
| I'm not happy with my work environment | $22 \%$ |
| I'm not happy with compensation | $31 \%$ |
| I'm not happy with benefits provided | $3 \%$ |
| I don't enjoy the work | $5 \%$ |
| There is not enough opportunity for advancement | $17 \%$ |
| There is a lack of training opportunities | $2 \%$ |
| I don't think I'm a good fit for the job | $3 \%$ |
| Other | $2 \%$ |
| Not applicable/I prefer not to answer | $5 \%$ |

Q: DECISION MAKERS: What do you (firms that have lost staff) believe are the primary reasons staff have left your firm?
Please select the top two reasons to the best of your knowledge.
Q: NON-DECISION MAKERS: Why do you (staff who plan on leaving their firms)
plan on leaving your firm? Please select the one primary reason.

Our survey results reflect the profession's positive momentum. They also support recent research suggesting where the fastest growth is taking place. As discussed, $55 \%$ of decision makers said they plan on hiring more staff in the next 12 months, whereas $26 \%$ of staff said they intend to leave their firm in the next two years. If both hold true, we can anticipate net growth among the respondent teams.

More RIAs (60\%) and hybrid firms (65\%) have hiring plans than respondents in other channels, where approximately $45 \%$ intend to hire over the next year. When asked which roles they want to fill, respondents said their plans are focused on expanding their advisory and client service teams, and they anticipate little activity regarding other roles.

|  | ROLE |
| :--- | :---: |
|  | PERCENTAGE <br> RESPONDING 'YES' |
| Junior adviser | $36 \%$ |
| Client service | $29 \%$ |
| Senior adviser | $27 \%$ |
| Administration | $25 \%$ |
| Paraplanner | $18 \%$ |
| Marketing | $9 \%$ |
| Analyst | $6 \%$ |
| Director/manager marketing | $4 \%$ |
| Director/manager business development | $2 \%$ |
| Technology support | $2 \%$ |
| Chief financial officer (CFO) | $1 \%$ |
| Chief marketing officer (CMO) | $1 \%$ |
| Director/manager client service | $1 \%$ |
| Director/manager operations | $1 \%$ |
| Chief Operating Officer (COO) | $1 \%$ |
|  |  |

Q: Whom do you (firms that plan on hiring) anticipate hiring in the next 12 months? Please select all that apply.

Despite their growth plans, however, many decision makers feel challenged by the hiring process. Only about a quarter reported being very satisfied with the internal hiring process at their firms.

Q: How satisfied are you with your hiring process?

## THE OUTSOURCING OPTION

A relatively high percentage of firms (42\%) outsource one or more functions to keep their businesses humming. Outsourcing is most popular among RIAs and hybrids, with slightly fewer broker-dealers saying they do so. Few respondents who work at wirehouses, where support structures differ, said they outsource.

> Q: Do you outsource any roles or functions on your team?

Among the $42 \%$ of firms that outsource now, $38 \%$ plan to outsource more in the future, and $59 \%$ say their level of outsourcing won't change; very few plan on outsourcing less. However, among the 58\% of respondents that do not outsource, only $8 \%$ intend to do so in the future. On the question of whether or not to outsource, it seems that firms tend to make a decision and stick with it.

Technology and compliance are the primary functions that firms look to outsource, followed by finance/bookkeeping and portfolio/investment management. Not surprisingly, the most commonly outsourced functions are those where decision makers have a broad choice of suppliers (e.g. investment management). The lower level of outsourcing for administrative and paraplanning functions may result from lack of alternatives - or, perhaps, lack of understanding how these functions could be outsourced effectively.

|  | OUTSOURCED ROLES |
| :--- | :---: |
|  | PERCENTAGE OF <br> FIRMS |
| Technology | $54 \%$ |
| Compliance | $45 \%$ |
| Portfolio/investment management | $34 \%$ |
| Finance/bookkeeping | $34 \%$ |
| Marketing | $30 \%$ |
| Other | $17 \%$ |
| Administration (e.g., supporting advisers) | $12 \%$ |
| Financial planning (e.g., paraplanner) | $10 \%$ |
| Client service (e.g., working directly with clients) | $4 \%$ |
| Business development/sales | $3 \%$ |
| General management | $2 \%$ |

Q: Which of the following functions do you (firms that currently outsource) outsource?

It is to the profession's credit that when team members plan to leave their firm, they rarely cite lack of development opportunities as a reason. Almost all survey respondents support their team members' personal and professional development, either through training, financial support or ongoing performance reviews.

Such initiatives and programs tend to be informal, according to our data. Although 60\% of respondents administer formal performance reviews, development activities such as new-employee training are overwhelmingly informal. The same is true for mentoring. At the same time, firms support team development financially, with $69 \%$ contributing to or paying for personal and professional development such as conferences and continuing education (see Benefits, above).

Staff who receive formal performance reviews said they typically have them annually (61\%), with $27 \%$ reporting a semi-annual review and $10 \%$ participating in quarterly reviews. Compensation is typically reviewed annually (60\%), and if not annually, most often on an ad hoc basis.

Q: How often is your performance formally reviewed?

Q: How often is your salary/compensation package reviewed?

The average firm invests $\$ 14,400$ in team development per year; however, that number varies widely based on firm size. The median amount is $\$ 5,000$ for all respondents, jumping to $\$ 22,500$ annually for firms with assets under management of $\$ 100$ million or more.

## INTRODUCTION

On the following pages, we provide an overview of key metrics by role. Where possible, the data is segmented by firm size (using assets under management as a proxy) and region. Although sample sizes for these segments are considerably smaller than the total, they provide good directional information on the impact of both size and region.

We classified firms as small, mid and large according to assets under management. The median AUM for firms in each segment is:

Small: $\$ 28.3$ million
Mid: $\$ 120$ million
Large: \$600 million

All compensation numbers are presented as medians rather than averages, because of the wide range in results.

## CEOS/PRESIDENTS

In the first part of this report, we examined how decision makers approach compensation and benefits. That group was largely composed of CEOs, senior financial advisers or planners who run their own firms, and some non-adviser managers. In addition to sharing how they structure compensation and benefits for the firm, they provided information about their own compensation and their views on their roles.

The following table shows feedback from the 151 respondents who identified themselves as CEOs/presidents. Forty-two percent of these respondents are with RIAs, $25 \%$ are with broker-dealers and $15 \%$ with hybrid firms. Eighty-nine percent of this group is male and $11 \%$ female. Sixty percent of this segment is age 50 or older.

## Highlights of the results:

- Overall compensation is strongly influenced by firm size.
- Incentives and bonuses for CEOs are often based on firm performance and driven by revenue growth.
- There is no standard with respect to vacation time taken among CEOs; however, those at larger firms reported working more hours per week than reported by those working at smaller firms.
- Job satisfaction is highest among CEOs at the largest firms, and they are more likely to be partners in the firm.
- $88 \%$ of CEOs/presidents held some designation or accreditation. The Certified Financial Plannerim (CFP ${ }^{\circledR}$ ) designation is the most commonly held (63\%). By contrast, $46 \%$ of the total respondent pool hold that certification.

## CEO OVERVIEW

COMPENSATION

## SENIOR FINANCIAL ADVISERS/PLANNERS

The following table summarizes feedback from the 287 respondents who identified themselves as senior financial advisers or planners. This segment was split across all channels, and $16 \%$ were solo practitioners with no other team members. Eighty-four percent of this segment is male and $16 \%$ female. Forty percent of the group is age 50 or older.

## Highlights of the results:

- Incentives play a significant role in overall compensation for senior financial advisers/planners.
- While total compensation varies depending on firm size and region, patterns are not obvious, perhaps because certain individuals receive significant compensation packages.
- Compared with all respondents, senior advisers/planners are somewhat more likely to receive additional benefits.
- Unlike CEOs/presidents, this cohort doesn't display a close correlation between job satisfaction and firm size, although overall satisfaction is relatively high.

## JUNIOR FINANCIAL ADVISERS/PLANNERS

Of our total respondents, 127 identified themselves as junior financial advisers or planners, whose feedback is summarized in the next table. Seventy-two percent of this segment is male and $28 \%$ female. Eleven percent is age 50 or older.

## Highlights of the results:

- Overall compensation for junior advisers/planners falls within a relatively narrow range when examined by firm or region.
- Compensation is largely driven by personal performance rather than tied to a team or to the firm as a whole.
- Only $40 \%$ of junior advisers have a formal role description, and just $46 \%$ receive formal performance reviews.
- Job satisfaction is generally below average among this segment.

## JUNIOR/ASSOCIATE FINANCIAL ADVISER/PLANNER OVERVIEW

| COMPENSATION | ASSETS |  |  | REGION |  |  |  | ALL JR. FINANCIAL ADVISER/PLANNERS MEDIAN | ALL <br> RESPONDENTS |

## NON-ADVISER MANAGEMENT

Feedback from the 73 respondents who identified themselves as non-adviser management appears in the table below. Thirty-nine percent of this group held a C-level position; the rest were in other management roles. Their functions included general management, compliance and business development. Because this group represents a small portion of the overall sample, it is not broken down into sub-segments by AUM or region. Sixty percent of the segment is male and $40 \%$ female. Thirty-four percent is age 50 or older.

## Highlights of the results:

- For non-adviser managers, base salary is a significant portion of overall compensation.
- Where incentives or bonuses are paid, they are typically linked to the firm's performance.
- This segment is less likely than others to be compensated based on revenue or asset growth.
- Overall job satisfaction is relatively high, though somewhat lower than the average for all respondents.

NON-ADVISER MANAGEMENT OVERVIEW

| Which of the following are used to determine your personal incentives/bonuses? (percentage selecting each category) |  |  |
| :---: | :---: | :---: |

| Licensing/exam fees | 94\% | 83\% |
| Vacation time | 71\% | 60\% |
| Sick time | 29\% | 32\% |
| Bereavement leave | 6\% | 5\% |

NON-ADVISER MANAGEMENT OVERVIEW (CONTINUED)

| COMPENSATION | ALL NON-ADVISER <br> MANAGEMENT MEDIAN |  |
| :--- | :---: | :---: |
| On average, how many weeks of vacation do you take each year? (percentage selecting) | ALL RESPONDENTS |  |
| None | $4 \%$ | $4 \%$ |
| $1-2$ | $38 \%$ | $37 \%$ |
| $3-4$ | $45 \%$ | $41 \%$ |
| $5-6$ | $9 \%$ | $11 \%$ |
| $7-8$ | $0 \%$ | $3 \%$ |
| $9-10$ | $2 \%$ | $2 \%$ |
| $11+$ | $2 \%$ | $2 \%$ |

PERFORMANCE
Is there a job description in place for your role? (percentage selecting)

| Yes, an informal understanding but no written document | 24\% | 33\% |
| :---: | :---: | :---: |
| Yes, a formal, written document | 59\% | 53\% |
| No | 16\% | 11\% |
| Not applicable/I don't know | 0\% | 2\% |
| Do you receive performance reviews? (percentage selecting) |  |  |
| Yes, informally or on an ad hoc basis | 27\% | 25\% |
| Yes, formally | 59\% | 51\% |
| No | 14\% | 22\% |
| Not applicable/I don't know. | 0\% | 1\% |
| How often is your salary/compensation package reviewed? (percentage selecting) |  |  |
| On an ad hoc basis | 19\% | 17\% |
| More often than once a year | 8\% | 2\% |
| Once a year | 59\% | 60\% |
| Every other year | 0\% | 2\% |
| Every three years or longer | 5\% | 3\% |
| Other | 3\% | 1\% |
| Not applicable/It isn't reviewed formally. | 5\% | 15\% |

When was the last time your base salary was increased? (percentage selecting)

| Less than 1 year ago | 41\% | 48\% |
| :---: | :---: | :---: |
| 1-2 years ago | 38\% | 18\% |
| 3-4 years ago | 8\% | 6\% |
| 5 or more years ago | 5\% | 4\% |
| Never | 8\% | 11\% |
| Not applicable/I don't know | 0\% | 13\% |

On average, how many hours a week do you work? (percentage selecting)

| <20 | 2\% | 1\% |
| :---: | :---: | :---: |
| 20-29 | 2\% | 3\% |
| 30-39 | 9\% | 13\% |
| 40-49 | 43\% | 52\% |
| 50-59 | 23\% | 21\% |
| 60+ | 21\% | 9\% |

## JOB SATISFACTION

How would you rate your level of overall job satisfaction? (percentage selecting)

| Very satisfied | 41\% | 44\% |
| :---: | :---: | :---: |
| Somewhat satisfied | 43\% | 33\% |
| Neutral | 11\% | 14\% |
| Not very satisfied | 5\% | 5\% |
| Very dissatisfied | 0\% | 4\% |

## SUPPORT TEAM

The following table summarizes feedback from the 56 respondents who identified themselves as support staff. Like non-adviser management, this was a small group, so we did not break it into sub-segments by AUM or region. Thirty-seven percent of the segment is male and $63 \%$ female. Twenty percent is age 50 or older.

Highlights of the results:

- Incentives and bonuses account for only a small portion of overall compensation among support staff.
- In general, this segment receives fewer benefits.
- Responsibilities for support staff are likely to be formally documented, and performance is likely to be formally reviewed.
- Overall job satisfaction for this segment is relatively low compared with the average for all respondents.

## SUPPORT TEAM OVERVIEW

## COMPENSATION

ALL SUPPORT TEAM
ALL
RESPONDENTS
Please complete the following as it relates to your annual compensation in 2014 (medians)

| Base | \$46 k | \$72 k |
| :---: | :---: | :---: |
| Incentive | \$8 k | \$50 k |
| Bonus | \$5 k | \$14 k |
| Other | \$10 k | \$120 k |
| Total | \$50 k | \$126 k |

* Please note that because medians are being used, the total will not be the sum of the component partson the question above.

Which of the following are used to determine your personal incentives/bonuses? (percentage selecting each category)
